

COVID-19 GUIDANCE FAQs FOR WALES

Why are there different documents for England and Wales being published at different times?

As Wales has a devolved Government, they have the responsibility to make decisions on the easing of lockdown restrictions in Wales. The Welsh Government undertakes a legal review of the current Alert Level and restrictions on a three-weekly basis. At the announcement of Friday 26th March, restrictions on organised outdoor activity for children/U18s were lifted in Wales.

When will I be able to play open age group cricket in Wales?

Subject to continued favourable public health conditions in Wales, we anticipate that organised outdoor group activity for up to 30 adults will be permitted to restart from the 26th April. This is due to be formally confirmed at the review on 22nd April. We will continue to work closely with key partners and will update our cricket related guidance shortly.

The current detailed Welsh guidance is available [here](#).

What if I live in Wales but want to play organised outdoor cricket in England?

Yes, you can play in England but must make yourself aware of wider Government guidance on travel and social distancing in England.

COVID –19 GUIDANCE FAQs FOR ENGLAND

What are the main changes from Step 1B (29th March) , to Step 2 (12th April)?

The activities permissible through organised outdoor cricket activity remain the same and therefore existing guidance should be followed.

The main changes for cricket relate to outdoor hospitality which is now permissible subject to following government guidance. The full guidance can be found [here](#).

Are parents allowed to attend organised cricket activities?

Parents/guardians and carers can be present under the following exemptions:

- carers for people with disabilities
- adults needing to supervise under-18s in a supervisory/safeguarding role, the supervising adults should always follow rules on social distancing

No child attending an organised activity should be made to feel unduly anxious because their parent/guardian/carer is not close by. This is a safeguarding issue and so a single suitable adult can be in attendance for a child's activities if required. The adult should stay for as short a time as possible and remain socially distanced from other adults, at all times.

Can Spectators attend from 12th April?

Under Government guidance spectators are not permitted in any indoor or outdoor sport facility at Step 1 (29th March) and Step 2 (12th April). Sporting events that are intended to attract spectators (including ticketed events), should not take place in a public space, or on private land, until Step 3 at the earliest and subject to Government permissions.

Clubs are not responsible for controlling who views cricket in public open spaces or for people on public footpaths, however they should not promote or encourage spectator attendance as outlined above.

Can clubs open for outdoor hospitality?

As part of Step 2 of the Government's Roadmap (12th April), outdoor hospitality at recreational cricket clubs is permitted. All participants must follow Government guidance on hospitality settings and specific advice for sport facility operators available on the Government's website. People using clubhouses and hospitality facilities must adhere to legal gathering limits and wider government guidance. Patrons or members of clubs may view cricket activity if they are following the guidance on hospitality.

Outdoor hospitality and outdoor organised activity are permissible at the same time, subject to compliance with relevant Government guidance.

Are there likely to be any travel restrictions?

In England, from the 29th of March it is permitted to travel for organised sport. Participants should always check that it is safe to travel before you set out to take part in organised cricket activity.

You should minimise travel wherever possible, but you can travel within England to take part in informal and organised cricket, where necessary. You cannot currently stay away from home overnight for cricket.

You can find more information in the government's [guidance on safer travel](#).

Is car sharing permitted for sport and physical activity?

Car sharing is not permitted with someone from outside your household or your support bubble unless your journey is undertaken for an exempt reason. Sport and physical activity are not exempt reasons, so you cannot car share for sport and physical activity.

The only exemption is for participants with a disability.

When can we open our changing rooms and club houses?

Changing rooms must remain closed except for disabled persons and emergency requirements. Participants should arrive in their kit ready to play and should return home in their kit.

From the 12th of April outdoor hospitality and outdoor organised sport can take place at the same time. Patrons are permissible, subject to following the outdoor guidance on hospitality and wider social gathering limits (2 households or rules of 6), clubs should ensure they fully comply with the hospitality guidance prior to considering opening for outdoor hospitality.

How do we open our nets safely and can we use every net?

All activity providers should carry out a risk assessment for the use of practice nets. This assessment will inform what mitigations need to be put in place to reduce the risk of transmission of the virus, as well as the other risk factors associated with net practice.

Activity providers should consider all the detailed requirements of opening the whole facility as well as the factors specific to the use of nets e.g., the safe capacity of the net facility, managing players, coaches etc in and out of the nets and on and off the site. Providers should also consider the requirements of sanitising any relevant equipment between net sessions.

An organised net session does not have a limit on numbers, in line with wider playing guidance. The risk assessment should also consider the safety of the players involved in any informal sessions, which would be limited to the 'rule of 6 or 2 households' (see [Government guidance](#) for further details)

During organised net sessions, the contact details of all participants should be recorded either via a register or NHS QR code.

In most cases every net can be used subject to maintenance and regular Health and Safety checks and an assessment to ensure social distancing can be maintained in the net facility and limit the number of participants accordingly.

What size of group can we have and what child supervision and coaching ratios should we aim for at practice sessions?

The Government have not stipulated any restrictions on group sizes. Therefore, organised cricket and supervised children's cricket can take place outdoors in safe numbers subject to a venue and activity COVID risk assessment.

Each venue and activity provider will have different amount of outdoor space and resource. The safe number of participants should be determined by a venue risk assessment and the venue must be able to demonstrate that social distancing can be maintained between participants (except in the limited circumstances during competitive play).

Your participants should feel safe when participating in cricket activity – listen to feedback related to numbers and if necessary, reduce group sizes.

You will also need to consider how your venue maintains social distancing at pick up and drop off times and staggering start times may be more applicable for some venues.

ECB guidance on supervision and coaching ratios for supervised children's activity should be maintained (with social distancing) - please note that the tables below set out the maximum number of participants per adult/activator/coach. Where your risk assessment determines that reduced participant numbers are required due to space restrictions for example, you must reduce the number of participants accordingly:

Supervision ratios must be adhered to as a minimum for clubs/activity providers looking after groups of children:			
<i>Age group</i>	<i>Adult</i>	<i>Children</i>	<i>Other considerations</i>
8 and under	1	8	for single gender groups, there must be at least one same gender supervising adult. For mixed groups there must be at least one male and one female supervising adult.
9 and over	1	10	

Recommended qualified coach/activator to participant ratios:		
<i>Programme</i>	<i>Activator/Coach</i>	<i>Participants</i>
National programmes (All Stars and Dynamos)	1 Activator	24
Softball practice	1 Coach	24
Hardball practice (not in nets)	1 Coach	16
Net practice	1 Coach	8

Are there any other considerations for disability cricket?

People with disabilities can participate in organised outdoor and indoor sport without being subject to social contact limits. Non-disabled people are not permitted to participate, except where necessary to enable the sport to take place (such as a carer or coach helping the disabled person to participate). Disabled participants are also exempt for car sharing.

Do we need 'batting lines' for the batters during match play?

Marked batting lines are not required in 2021. Batters should remain socially distanced from other players and the umpire at all times and run on opposite sides of the pitch.
